

Finedust Filter

Type G90

Overview

The G90 family are filters of medium efficiency, both inexpensive and disposable .The filtration media is laminated to a wire grid that creates its efficient radial shape and prevents sagging or collapse, even under difficult conditions.

FEATURES:

- **Efficiencies of 30% up to 60% ASHRAE**
- **Lowest initial pressure drop**
- **High quality standards due to Quality Assurance System**
- **Highly economical through high final pressure drop**
- **Any airflow direction possible making installation easy**

Design and Construction

The G90 family of filters are made from die cut frame rigid cardboard, which makes them resistant to humidity and provides them with extra durability when assembled. The grid board supports on each side of the filter are built into the frame. These supports are also attached to each pleat in the frame to ensure stability and consistent spacing of the pleats. The filtration media is glued to the entire frame to prevent any air bypass.

The media consists of a combination of nonwoven cotton and polyester, specifically designed for high dust-loading capacity.

Finedust - HEPA / ULPA

Fine Dust Filter
Final Filter for Fan Filter Units
Final Filter for Clean Rooms
Final Filter for Channel Installation
Highly Active Filter Surface - Low Pressure Drop
Final Filter for Grid Systems

Technical Data G4

AVAILABLE STANDARDS:

- High quality standard due to Quality Assurance System
- ISO 9001:2015

HEPA & ULPA Filters for Industrial Clean Rooms

FILT AIR Ltd. specializes in the use of advanced technologies to implement a purified air supply for high-tech industry clean rooms, the microelectronics business sectors, and pharmaceutical industries. FILT AIR Ltd. has a broad range of client groups, such as hospitals, industrial plants, commercial buildings, and companies requiring clean air inside gas turbines.

FILT AIR's range of products is designed and produced in order to achieve the highest possible quality and offers safety and reliability with optimum prices and product availability. Since 2001, FILT AIR Ltd. has been registered and certified for Quality Management according to ISO 9001 (Registration No: IQNet: IL-24203).
